Hello, I'm Harshit

Aspiring Web Developer & UI Enthusiast

Welcome to my student portfolio, where I showcase my journey into web development. My focus is on creating **visually appealing, semantic, and highly structured websites** using foundational technologies.
This site is built entirely with **HTML and Basic CSS**, demonstrating strict adherence to standards and my practical ability to implement modern layouts using **Flexbox** for alignment and **Float** where required for traditional wrapping effects.

Explore My Work

Featured Projects

My learning journey is driven by practical application. Here are a few projects that highlight my initial mastery of HTML and CSS styling:

Project 1: Simple Landing Page

A static landing page built to master typography, color theory, and box model spacing.
~~View Details~~

Project 2: Responsive Photo Gallery

A project showcasing basic responsive principles and using CSS properties to

Project 3: Advanced Form Design

A detailed exercise in styling complex form elements, labels, and validation messages for better user experience.

Technical Toolkit

I build robust front-ends using the following core technologies, the proficiency of which is demonstrated throughout this site:

- HTML5: Semantic markup and proper document structure.
- CSS3: Styling, typography, color management.
- Flexbox: Essential for modern component alignment and responsive design.
- Forms: Designing accessible and styled data input methods.

Ready to Connect?

I am eager to apply my growing skills in collaborative environments. Feel free to reach out to discuss academic projects or learning opportunities.

Contact Me

Get to Know Me

Hello! I am Harshit Yadav, a dedicated and enthusiastic student focused on mastering modern web development principles and creating efficient, elegant user interfaces.

I am currently pursuing a degree in Information Technology, where I have cultivated a strong foundation in both technical problem-solving and creative design thinking.

My passion lies in building accessible and responsive digital experiences using foundational technologies like HTML and CSS, which forms the core of my practical skills demonstrated here.

I enjoy the challenges of writing clean, maintainable code and am always eager to learn new tools and techniques to enhance my development workflow and academic profile.

When I step away from the keyboard, you can find me playing valorant or playing cartoon games like FREE FIRE, which helps balance my academic life.

My Skills & Projects

HTML5 Semantic Markup

Proficiently structure content using modern semantic tags (`
`,`
`, etc.) for better accessibility.
Ensuring clean, organized, and SEO-friendly code.

CSS Layout: Flexbox

Mastery of the FLEXBOX module for creating efficient, single-dimensional layouts and aligning items beautifully.
Used to structure common elements like navigation and card grids.

CSS Layout: Float

Demonstrated ability to use the FLOAT property for traditional layout requirements, such as text wrapping around images.
Successfully manages float clearing for predictable results.
